

SOFT PVC BELLOWS

Soft PVC Bellows occupy a special position among the different types of bellows. ELASTIC Bellows (see Chapter ELASTIC Bellows) offer extremely flexible design options with regard to material, dimensions and shape and can nevertheless also be produced economically in very small quantities.

Soft PVC Bellows in standard colour black

Soft PVC Bellows on the other hand are moulded parts, i. e. a certain minimum quantity or corresponding tooling must be available to justify economic production.

Correspondingly, cost reduction can be achieved with larger quantities which makes these parts particularly well suited for large series use.

Tooling is already available for many configurations, therefore attractive prices can be offered even for smaller quantities. The dimensions and shapes shown in the catalogue are available as standard forms. In addition we would be pleased to assist you in the design of special types.

Large variety of forms and colours

Split version

Material

We use a special PVC as standard material. The bellows are resistant to alkalis and acids; they are water and dust-proof. The standard colour of these bellows is black, but other colours as well as a version in transparent material are also possible.

Temperature

The operating temperature range is between -20°C and $+80^{\circ}\text{C}$. For a short time a maximum operating temperature up to $+120^{\circ}\text{C}$ is possible.

Legend

ID	Inside diameter
AD	Outer diameter
FAZ	Extension per fold
FZD	Compression per fold

Customer specification resp. incidental by parameter

$L_{\min}$	Compression of bellow
$L_{\max}$	Extension of bellow
①	Width of sleeve 1
②	Width of sleeve 2
